Bing

Semi-dwarf. Most widely grown sweet cherry. Large, dark red fruit is produced on this vigorous growing tree. Firm and meaty flesh is purple and freestone. Pollinate with 'Black Tartarian', or 'Stella'. Does not pollinate with 'Lambert'.

H: 18-25' W: 18-25' Zones: 5-8

Stella

Semi-dwarf. Large, heart-shaped, dark red fruit are produced on this self-pollinating sweet cherry. Sweet, rich flavor on a vigorous, productive tree make this an excellent choice. Moderate crack resistance. Can pollinate other sweet cherries.

H: 18-20' W: 18-20' Zones: 5-8

Black Tartarian

Semi-dwarf. Vigorous, erect grower. Heavy bearer of large, bright purplish-black fruit. Tender, juicy and very rich. Requires any sweet cherry for pollination.

Zones: 5-8

Montmorency

A plant with a storied American history, 'Montmorency' is, by far, the most widely grown 'sour cherry' or 'pie cherry' tree in America with nearly 100 years of fruiting history. Vigorous growing, 'Montmorency' is a heavy spring bloomer with clouds of small white, fragrant flowers followed up by a bumper crop of sizable cherries that mature in July and August. Perfect for pies and baked goods, these cherries are also quite good eating fresh especially if left on the tree until almost overripe to attain the highest sugar content possible.

H: 20-25' W: 20-25' Zones: 3-8

Prunus X 'Montmorency'
